

Collier Vineyards, Turner, Oregon

A unique opportunity to run your own vineyard! We have a small ¼ acre 10 year old vineyard. The grapes are 777 Clone Pinot Noir, north-facing, with an average yield of 200-500 lbs. The vineyard would be yours to work from now until harvest and include trimming of vines, spraying, thinning leaves, and picking. We have a sprayer and other winemaking equipment on site and love to help with picking in the fall. We will be out of town too often this year to properly maintain. You can make your own wine with the grapes, or can be sold to our usual buyer.
